

CONTENTS

Preface	viii
Contributors	ix
A Stieltjes Function in Two Variables <i>María Álvarez de Morales, Lidia Fernández, Teresa E. Pérez,</i> <i>and Miguel A. Piñar</i>	1
Asymptotics of the Weighted Uniform Error of Linear Spline Interpolation of C^2 Functions and Applications <i>Yuliya Babenko</i>	14
Conditionally Positive Definite Kernels and Pontryagin Spaces <i>Georg Berschneider and Wolfgang zu Castell</i>	27
On the Stability of Compactly Supported Biorthogonal Spline Wavelets <i>Kai Bittner</i>	38
Quantitative Approximation of Semigroups and Resolvent Operators by Iterates of Stancu Operators <i>Michele Campiti and Cristian Tacelli</i>	50
Lagrange Polynomial Interpolation <i>Debao Chen and Ward Cheney</i>	60
Spectral Properties of the Collocation Matrices of Bases of Rational Spaces <i>Jorge Delgado and J. M. Peña</i>	77
The Cyclic Projections Algorithm: The Rate of Convergence <i>Frank Deutsch and Hein Hundal</i>	87
de Rham Transform of a Hermite Subdivision Scheme <i>Serge Dubuc and Jean-Louis Merrien</i>	121
Generalized Native Spaces <i>John F. Erickson and Gregory E. Fasshauer</i>	133
Some Comments on the Comparison Between Condition Numbers and Projection Constants <i>Simon Foucart</i>	143
Invariance Theorems of Approximation for Locally Compact Groups <i>Michael I. Ganzburg</i>	157

Nonstationary Subdivision Schemes and Totally Positive Refinable Functions <i>Laura Gori and Francesca Pitolli</i>	169
Log-exponential Analogues of Univariate Subdivision Schemes in Lie Groups and their Smoothness Properties <i>Philipp Grohs and Johannes Wallner</i>	181
Multiresolution Analysis for Implicitly Defined Algebraic Spline Curves with Weighted Wavelets <i>Mario Kapl and Bert Jüttler</i>	191
From Wavelets to Shearlets and Back Again <i>Gitta Kutyniok and Tomas Sauer</i>	201
Multivariate Splines for Data Fitting and Approximation <i>Ming-Jun Lai</i>	210
Refinable Box Splines and Subdivision <i>Jian-ao Lian</i>	229
Interpolation and Approximation by Entire Functions <i>Friedrich Littmann</i>	243
Mutually Regular Measures Have Similar Universality Limits <i>Doron S. Lubinsky</i>	256
A Review of Analysis of and on Data Sets Based on Diffusion on Graphs and Manifolds <i>Mauro Maggioni</i>	270
A Local Construction for Non-uniform Spline Tight Wavelet Frames <i>Martin Reimers</i>	320
The Parameterization of the Length Eight Orthogonal Wavelets with No Parameter Constraints <i>David W. Roach</i>	332
A Trade-off Principle in Connection with the Approximation by Positive Definite Kernels <i>Dominik Schmid</i>	348
Variational Methods with Higher-Order Derivatives in Image Processing <i>Simon Setzer and Gabriele Steidl</i>	360
On Error Formulas for Multivariate Polynomial Interpolation <i>Boris Shekhtman</i>	386
On the L_p -stability of Quasi-hierarchical Powell-Sabin B-splines <i>Hendrik Speleers, Paul Dierckx and Stefan Vandewalle</i>	398

Simultaneous Approximation of Intrinsic Mode Functions by
Smooth Functions with Piece-Wise Linear Amplitude and Phase
Vesselin Vatchev 414

Direct and Inverse Theorems for RBF-type Functions: Implications
and Applications
Joseph D. Ward 425
